Docker GitHub Claude

HOBBIES

🎸 bass guitar
🚗 older cars
🎵 music
🗺️ traveling
🔧 hardware
🌍 foreign langs

ABOUT

Creative fullstack developer with nearly 4 years of professional experience across web applications, internal systems, mobile apps, and 3D. Built production platforms for the medical events sector, decentralized blockchain applications for the gaming industry, and fullstack tools for document and media processing. Experienced in running and integrating local AI/LLM models. Comfortable across the entire stack: React/Next.js on the frontend, Python/Node.js on the backend, PostgreSQL/MongoDB for data, and Docker for deployment. Personally passionate about WebGL, modding, and building useful and entertaining code

EXPERIENCE

SKOFTWARE

Sep 2025 - Present

B2B Freelance Fullstack Developer

React • TailwindCSS • Python • PostgreSQL • TypeScript • MobX • Git

- Placeholder duty 1
Placeholder duty 2
Placeholder duty 3

BUSINESS SERVICE GALOP

May 2024 - Aug 2025

Front-End Developer

PHP • MySQL • Laravel • React Native • Vanilla JS • TypeScript • Next.js • TailwindCSS • Git

- Updated and expanded the internal event management system with new functionalities, system optimizations, and bug fixes; designed a new participant zone integrated into the event websites; created a dedicated system instance tailored to the needs of a major client, supporting diverse medical courses and events
Developed a management system for the Endoscopy Section and a VoD platform for purchasing and accessing recorded conference content, dedicated front-end solutions for medical events (customized registration forms and websites, participant zones, API integrations) and responsive mailings compatible across all major email services
Developed a mobile application for Zebra data collectors and a web application for attendance tracking during event sessions, supporting both self-scanning kiosks and Zebra scanners
Built a customizable live voting application with an administrative panel and real-time results; developed virtual exhibitor booths with documentation for partner companies
Provided onsite IT support during events across Poland, ensuring smooth operation of software systems and hardware reliability; assisted event participants when needed, including at international conferences; represented the IT department during international meetings and occasionally served as a company driver

ANFATA GAMES

Sep 2022 - Aug 2023

Junior Web3 Frontend Developer

Next.js • TypeScript • GSAP • Sanity CMS • Moralis • Firebase • Web3 • TailwindCSS • Git

- Developed a decentralized application integrated with Smart Contracts and ImmutableX collections, including building a marketplace, bridging NFTs between L1 and L2, enabling transfers between accounts, and implementing a live auction system.
Worked with Moralis and Firebase databases and cloud functions, using TypeScript, Next.js, GSAP, and version control systems like GitLab and Bitbucket.
Implemented a new homepage, integrated a Sanity CMS blog system, and built custom event-oriented websites and features across company platforms.
Performed manual testing of Pirates of the Arrland, including the 3D MOBA game and 2D strategic map components within the decentralized app.
Collaborated closely with cross-functional and international team to deliver integrated Web3 experiences.

SELECTED PROJECTS

POLONEZ AUTODRIVE

JavaScript • Three.js • 3D Studio Max 2019

A synthwave-style 3D coloring-book like animation with real-time model and color customization of the scene via a built-in GUI. Built with creativity and models from 3D Studio Max. Now includes a beta overtaking mini-game.

VAT-OFF

JavaScript • Chrome Extension API • CSS

Chrome extension that shows prices excluding VAT when you hover over them on any website. It detects prices on the page and displays the net amount in a tooltip and in the extension popup. Supports 120+ countries with preconfigured currencies and VAT rates, and allows custom VAT rate and currency. Features a built-in VAT calculator (GROSS/NET) in the popup. Available on the Chrome Web Store.

SKOFTWARE - my portfolio

Next.js • TypeScript • TailwindCSS • React Three Fiber/Three.js • Blender

Single page portfolio website with 3D scene and built-in web (HTML & CSS) version of resume. Hero scene is made in Blender and converted to React Three Fiber JSX components for easier interactivity. Pure web experiments and React Three Fiber battleground.

Yet Another Weather App

React • JavaScript • Sass • Vanta.js • Open-Meteo API

A weather app with real-time 3D visual feedback reflecting actual weather conditions. Pick a city from an interactive map or use geolocation — the interface responds with dynamic elements and backgrounds tied to live weather data. Recently migrated from OpenWeather to Open-Meteo. Still desktop-only for now.
